

## Student Visa SOP Sample for Canada Artificial Intelligence and Data Science Post Graduate

To,

The Visa Officer

High Commission of Canada, India

Subject: Request for a study VISA permit to pursue Post Graduate Program in Artificial Intelligence and Data Science at Loyalist College, Canada.

Dear Sir/Madam,

I am <Name>, a citizen of India holding <Passport no.> hailing from <City>. I have completed my bachelor's studies and now wish to attain higher education to learn more and move ahead in my career. For this, I had applied for the two-year Post Graduate in Artificial Intelligence and Data Science program at Loyalist College, Canada, and thankfully, recently received a letter of acceptance. Through this statement of purpose, I intend to run you through my background and professional experience and my motivation to study this program at the said university. Ultimately, through my application, I courteously request you to grant me a study permit so I can fulfill my dreams and realize my full potential.

### ACADEMIC BACKGROUND

Even from the formative years of my education, I have excelled in my academic endeavour. I have always been interested in Science and Mathematics and have wanted to become an engineer ever since I got the hang of what engineers do. Therefore, after completing 10th from the State Board with an impressive <Percentage>, I performed reasonably well in my pre-university education as well. As a result, I have completed my B.E. in Electrical and Electronics from <College Name>. I have been part of two major projects during my undergraduate, namely, <Project's Name>. I have also attended the National Level Workshop on Recent Advancements in <Profession> for two days.

### PROFESSIONAL BACKGROUND

Post studying <Course>, I decided to get professional exposure, for which I searched for companies that will help me in my growth. After one year of research and analysis, I joined <Company> as an <Designation>. Here I got excellent and practical exposure in Designing, monitoring, analyzing, and troubleshooting IT systems. I also maintained MIS tools, prepared MIS operations, and worked with MIS Executive teams to develop monthly reports for stakeholders. Then, I switched jobs and started working at <Organisation> as a <Designation>. My responsibilities here included <Authorities>.

### WHY ARTIFICIAL INTELLIGENCE AND DATA SCIENCE POST GRADUATE PROGRAM?

Having completed engineering in <Field>, I am well-versed with basic concepts in this course and now wish to expand my horizons to gain a professional edge. Therefore, I want to explore the various applications of AIGS, including artificial intelligence, Data Science, product development, and programming skills, which are the key offerings of Artificial Intelligence and Data Science. Therefore, I decided to pursue my post-graduation with this course to gain a profound piece of knowledge in this field. This course will develop a firm clutch on the subjects included in this course. It will also help me to enhance my personal and professional skills. Moreover, it will avail me to boost my career by proffering me a practical understanding of the latest technologies. Thus, I decided to pursue this course to take one step further in the right direction towards my career and profession, and I decided to pursue this course.

### WHY LOYALIST COLLEGE?

First of all, while researching for the course, I was convinced by the AIGS offered by Loyalist College. Upon further online research and discussions with my colleagues and seniors, I discerned that Loyalist College is a highly ranked university in Canada and renowned globally. Besides, the university has many research opportunities for the students and has the state-of-the-art infrastructure to nurture aspiring professionals. This college also houses numerous cultural clubs and activities, allowing me to grow more holistically instead of being restricted to only academia. With its approach to experiential learning, the next-generation university will prove instrumental in shaping my career back in India.

### WHY CANADA AND NOT INDIA?

I decided to apply to Canadian universities for the numerous internship, entrepreneurship, and project opportunities students get along with their curriculum. Additionally, the Education System in Canada is pristine; the regular updates in the curriculum to keep it modern and relevant and the involvement of acclaimed faculty to keep it going. Students do not only learn but gain a sense of achievement as they understand the concepts in detail. Other than this, studying in Canada offers a wholesome package; the country is safer than most international countries, it has an environment perfect for obtaining knowledge and has world-class technology for students, especially those coming from India, to learn from. Thus, choosing Canada was not tricky for me.

I decided not to study in India because of the substandard quality of higher education. The modules taught at universities are not updated for decades, requiring students to seek supplementary education through online courses.

## **FUTURE PLANS**

Lately, there has been a large influx and birth of IT and Software Development companies in India. Moreover, the country is in a developing state, meaning that many advancements need to be made in terms of technology. To be a part of this revolution, I am confident that the AIGS degree from Loyalist College will open many gates for me. I will be able to compete for jobs as a Data Scientist in companies such as Google, Microsoft, Walmart, or Amazon or lead a startup to race with these giants. However, in the long run, my objective is to put my passion for AI and Data Science into becoming a competent professional in the IT industry while also devoting my creativity and technical dexterity to developing revolutionary intelligent technologies by concentrating on both the development and implementation parts.

## **TIES TO HOME COUNTRY**

I come from a humble traditional Indian family. However, we have deep roots in the socio-economic framework of India, and all of us have planned to live our lives over here only. I have a total of <Amount> of movable and immovable assets in India which include an apartment and my house. As opposed to staying abroad, living expenses in India are nominal. Therefore, my plans are pressed upon returning to India. Also, I am the eldest son of my parents and have one younger sibling. My mother, <Profession>, has done all she could to instill good cultural and traditional values in me. I trust that I am not only responsible but also obliged to look after my mother as she is growing old now. Therefore, upon graduating with an AIGS degree from Loyalist College, Canada, I will have a resumé that will empower me to land a significant position in a leading IT MNC in India.

## **FINANCE FOR STUDIES**

I have completed the payment for my two-year tuition fee, <Amount>. Additionally, I have transferred an amount of <Amount> to my student's GIC account, which will help me manage my living expenses upon arrival. With the help of my mother, I am sponsoring myself for my further studies and will take care of Tuition Fees and Living Expenses for the entire duration.

## **LANGUAGE PROFICIENCY**

I am proficient in the English language and can easily interact and study in English while living in Canada. My overall IELTS band score is <Points>, in which I earned <Points> bands in Listening, <Points> bands in Reading, <Points> in Speaking, and <Points> bands in Writing.

## **SELF DECLARATION**

I hereby declare that all the information provided above is true to the best of my knowledge.

Regards,
