

Academic Letter of Recommendation (LOR) Sample

To,
Whomsoever it may concern.

Respected Sir/Ma'am,

It proffers me immense delight to write this letter of recommendation for one of our most remarkable students, {Name}. I have been opportune enough to teach him the subject of Advanced Surface Engineering alongside guiding him through the Welding Laboratory. I can undoubtedly say that he impressed me hugely with his invincible intellectual capabilities, his supreme ability to translate his understanding of the concepts to actual working models & his talent for imparting his best knowledge to others.

His real-time functioning capabilities got revealed in front of me when he worked on a project under me during his pre-final year, which was 'Thermal Analysis on 316L Austenitic Stainless Steel by Sysweld Software.' This was surprising to me as {Name} decided to work on this project solely with his own will as it was not made mandatory by the department to partake in a pre-final year project. This clearly describes his consistent desire to learn more and his ability to take initiatives, whenever possible. I also guided him for his final-year project which was actually a real-time experiment, 'Friction Stir Welding of Dissimilar Metals of Austenitic Stainless Steel 316 to Super Austenitic Stainless Steel 904L in a Modified Milling Machine.' He deservedly gained appreciation for his performance in the project. Excelling in academics, he has always been consistent in lab sessions.

With all his accomplishments and quest to learn more, he wants to pursue a Master's in {name of the field} from your renowned university. I'm unquestionably sure that he will continue to showcase the same attitude, perseverance, and hard work while studying at your prestigious university as well. I highly recommend him to your university's Master's program as he is destined to bring great laurels to any institute he proceeds to, just as he did to our institute.

Regards,

{Name}

Assistant Professor
